Usage of local terminals … in 10 minutes and on 1 slide!

- Login with the 'trcray?' UID and the **System password** given in the letter addressed to you.

- From the 'Chameleon' (down left corner) open a Terminal (Konsole). From this terminal you can run '***ssh –X cca***' to access the Cray HPCF.

    - Editors available on cca are '***vi***', '***gvim***', '***gedit***', '***xedit***', '***emacs***'.

- The classroom printer (ps_classroom) is available from your desktop or cca:

    '***lpr –Pps_classroom <filename>***'

- Start Firefox. Go to 'www.ecmwf.int'. Login with your 'trcray?' UID and the **Web password** shown on the letter. Let Firefox remember this password. Then go to 'software.ecmwf.int' and search for 'hpcf'. Select the "hpcf" training page. <u>This is the 'home' page for this course</u>.

- You can start '***~trx/view_slides***' or '***~trx/view_demo***' (on your PC) to follow on your desktop screen what is shown on the white screen.

- Before leaving in the evening, remember to **lock** your login session, to exit '***qsub –I***' sessions on cca and possibly to check for zombie jobs.
