

Change in the Web API behaviour: expected fields vs. retrieved fields

This change will be implemented on 28 Feb 2018

If you are using either [Access ECMWF Public Datasets](#) or [Access MARS](#) to get ECMWF data, from 28 Feb 2018 onward the system will fail if the number of expected fields is different than the number of retrieved fields. More information here:

[Troubleshooting MARS_EXPECTED_FIELDS](#)
