

What air quality data is available for Europe

The Copernicus Atmosphere Monitoring Service (CAMS) provides air quality data for Europe. Products include forecasts for the next four days as well as analysis of past air quality.

More detail:

- Description of air quality products (portfolio): http://www.regional.atmosphere.copernicus.eu/index.php?category=documentation&subensemble=macq_raaq_project
- User guide for the web site: http://www.regional.atmosphere.copernicus.eu/index.php?category=documentation&subensemble=macq_raaq_web_site
- Frequently asked questions: http://www.regional.atmosphere.copernicus.eu/index.php?category=documentation&subensemble=macq_raaq_faq
- Data access: http://www.regional.atmosphere.copernicus.eu/index.php?category=data_access
- [Guidelines for Numerical Data](#) which describes the file naming conventions and data format, as well as programmatic data access. See also [In the CAMS Regional \(European\) service, how can I access data programmatically?](#)

Notes:

- Some information and guidance refers to 'regional data' or 'regional production', in this context the word 'regional' refers to Europe.
