ecflow release 4.15.0

Bug

- [ECFLOW-1488] - ecFlowUI: extra forward slash in event names in trigger view
- [ECFLOW-1496] - ecflow_ui: Timeline view showing incorrect timings
- [ECFLOW-1497] - ecFlowUI: year is always shown as 2018 in timeline from and start time widgets
- [ECFLOW-1498] - ecFlowUI: crash when deleting modified generated server variable
- [ECFLOW-1500] - ecFlow crash after deleting Jira label from GUI
- [ECFLOW-1501] - client: --suites formatting get messed up when suite name greater than 20 chars
- [ECFLOW-1507] - ecFlowUI: daily view shows data beyond period end in timeline view

New Feature

- [ECFLOW-1494] - ecFlowUI: add an option for rerun aborted for families
- [ECFLOW-1499] - ecFlowUI: enable timeline view to load user specified log files
- [ECFLOW-1506] - ecFlowUI: add option to control maximum size of logfile data used for timeline view
- [ECFLOW-1508] - ecFlowUI: add zoom to daily view of node info in timeline view
- [ECFLOW-1515] - ecFlowUi: add option to user regexp match for timeline path filter

Improvement

- [ECFLOW-1486] - Implement a way of specifying the userid to be used for ssh commands (other than the current id)
- [ECFLOW-1502] - ecFlowUI: add option to show only the children of selected node in timeline
- [ECFLOW-1509] - server: hide children - show children leading to content loss during plug
- [ECFLOW-1512] - server: improve resolution of status change time
- [ECFLOW-1518] - ecFlowUI: add tooltip explanation to the triggered by view in the trigger panel
