

European Weather Cloud User Workshop 13 October 2022 - Save the date

We are pleased to announce a new edition of the European Weather Cloud User Workshop, jointly organised by ECMWF and EUMETSAT. The event will be completely virtual on 13 October 2022.

This workshop is open to Member and Co-operating States of EUMETSAT and ECMWF. If you meet the attendance criteria and would like to participate, we would kindly ask you to complete the [registration form](#) before 30 September.

As we are soon entering the operational phase, we will cover governance, access and operational aspects of usage. We will also give the floor to current pre-operational users with interesting use cases and discuss the plans for future evolution of the EWC. We will combine presentations from ECMWF, EUMETSAT, and Users, as well as interactive sessions for discussions, feedback, and exchange of ideas. The full programme will be made available closer to the event date.

We look forward to seeing you at the European Weather Cloud User Workshop!
