

5.2 Training material: webinars

The centres also run webinars on topics that are requested by the partners. These webinars are recorded and users can find them on the [EFAS webinars](#) webpage. All available webinars are listed below in descending order, most recent one first. Please note that the older webinars might in some parts be outdated, but still contain some relevant information. Older webinars are successively re-recorded to reflect the most recent state of the EFAS service.
