

European Weather Cloud User Workshop 26 September - Save the date!

We are pleased to announce a new edition of the European Weather Cloud User Workshop. The event will be completely virtual on 26 September 2023.

We will cover new aspects of the EWC and different ways to benefit from it as we enter the operational phase. We will also give the floor to current users with interesting use cases and discuss the plans for the future evolution of the EWC. We will combine presentations from ECMWF, EUMETSAT, and EWC Users, as well as interactive sessions for discussions, feedback, and exchange of ideas. If you would like to share your experiences and work in the EWC, get in touch with us via the [European Weather Cloud Support Portal](#).

This workshop is organised jointly by ECMWF and EUMETSAT and is open to their Member and Co-operating States. Save the date in your calendar! We will get in touch with the registration details and full programme closer to the event date.

We look forward to seeing you at the European Weather Cloud User Workshop!
