

UERRA archive

UERRA, Uncertainties in Ensembles of Regional ReAnalysis, is a project related to meteorological observations funded under EU - Framework Programme 7. It includes recovery of historical (last century) data, estimating uncertainties in the re-analyses and user friendly data services. It aims to contribute to the future Copernicus climate change service.

The role of ECMWF is to create and host a data archive of selected meteorological fields for UERRA purposes.

How to refer to UERRA in a paper

Please use the following acknowledgement: **"This work is based on UERRA (EU FP7 Collaborative Project, Grant agreement 607193)"**

It is important to mention the data source of your research to be able to keep the UERRA archive alive for longer.

Regarding UERRA data sources, please cite:

- For COSMO data: <http://uerra.eu/component/dpattachments/?task=attachment.download&id=397>
- For HARMONIE data: <http://uerra.eu/component/dpattachments/?task=attachment.download&id=296>
- For MESCAN-SURFEX data: <http://www.uerra.eu/component/dpattachments/?task=attachment.download&id=399>
- For UM data: <http://uerra.eu/component/dpattachments/?task=attachment.download&id=284>
