

# ecaccess-job-list

## NAME

ecaccess-job-list - List all EAccess Jobs

## SYNOPSIS

**ecaccess-job-list -version|-help|-manual**

**ecaccess-job-list [-debug] [*job-id*]**

## DESCRIPTION

List all your EAccess Jobs. When a *job-id* is specified then the details for this job are displayed.

The Job statuses can have the following values:

### INIT

Jobs are being initialised

### STDBY

Jobs are waiting for an event

### EXEC

Jobs are running

### WAIT

Jobs have been queued to the scheduler (e.g. LoadLeveler)

### RETR

Jobs will be resubmitted

### STOP

Jobs have NOT completed (error)

### DONE

Jobs have successfully completed

## ARGUMENTS

*job-id* (optional)

The identifier of the ECaccess Job to retrieve the details.

## OPTIONS

**-version**

Display version number and exits.

**-help**

Print a brief help message and exits.

**-manual**

Prints the manual page and exits.

**-retry** *count*

Number of SSL connection retries per 5s to ECMWF. This parameter only apply to the initial SSL connection initiated by the command to the ECMWF server. It does not apply to all the subsequent requests made afterward as it is mainly targeting errors that can happen from time to time during the SSL handshake. Default is no retry.

**-debug**

Display the SOAP and SSL messages exchanged.

## EXAMPLES

**ecaccess-job-list** 124356

Give the information concerning the ECaccess Job with identifier 124356.

**ecaccess-job-list**

List all your ECaccess Jobs in the spool.
