

Changes in version 000410

The default behaviour on this version is to abort execution on GRIBEX calls, as its functionality is deprecated. The package can, alternatively, be configured to avoid aborting, by configuring with:
`cmake -DENABLE_GRIBEX_ABORT=OFF ... /path/to/libemos`

Notes

- GRIBEX support is disabled
- Tested against BUFR tables version 000405, please check also changes of the previous version 000404.

Improvement

- [\[EMOS-152\]](#) - added basic support for pkg-config

Bug Fixes

- Improved bufr testing
