

10 metre wind direction

GRIB-API definition

| | | | | | | | |
|------|-------------------------|--------------|--------|------|-------------|----------|------------------------|
| Name | 10 metre wind direction | Abbreviation | 10wdir | Unit | degree true | paramId: | 260260 |
|------|-------------------------|--------------|--------|------|-------------|----------|------------------------|

UERRA details

| | |
|------------|------------------------------------|
| Definition | Wind direction at a height of 10m. |
| Validity | instantaneous |
| Comment | |

WMO GRIB2 definition

| Parameter | | |
|--------------------|---|-------------------------------------|
| Discipline | 0 | meteorological products |
| Parameter category | 2 | momentum |
| Parameter number | 0 | wind direction (from which blowing) |

| Level | | |
|--------------------------------------|---------------|---|
| Type of first fixed surface | 103 | specified height level above ground (m) |
| Scale factor of first fixed surface | 0 | |
| Scaled value of first fixed surface | 10 | |
| Type of second fixed surface | all bits to 1 | missing |
| Scale factor of second fixed surface | all bits to 1 | missing |
| Scaled value of second fixed surface | all bits to 1 | missing |
