

# High-level Pythonic Interface in ecCodes (deprecated)

Note: The high-level Python interface was always **experimental and has been removed (from version 1.4.0)**. Please use [metview](#), [cfgrid](#) and/or [pdufr](#) instead.

## Deprecated Python classes

The following Python classes have been removed:

**GribFile** and **BufrFile**: Classes that implement access to a GRIB/BUFR file.

**GribMessage** and **BufrMessage**: Classes that implement access to a GRIB/BUFR message.

**GribIndex**: A class that implements a GRIB index that allows access to the indexing functionality.

These were in the directory "eccodes/high\_level".
